

# Cliffside Park Public Schools

## COURSE OF STUDY UNIT PLANNING GUIDE FOR: GEOMETRY UNIT 2

Grade Level:  
10th

Cliffside Park School District  
Cliffside Park, NJ 07010  
[www.cliffsidepark.edu](http://www.cliffsidepark.edu)

## Course Overview:

The study of High School geometry involves the study of Euclidean geometry. Students study congruence in terms of rigid motions. Experiment with transformations of shapes in the plane. Prove geometric theorems and make geometric conjectures. Students are required to understand similarity in terms of transformations. Prove theorems involving similarity. Define trigonometric ratios and solve problems using right triangles. They then use this understanding to apply trigonometry to general triangles.

Study continues with circles and the understanding and application of theorems about circles. Students explore arc lengths and areas of sectors. The course continues with translations between geometric descriptions and questions of conic sections. Coordinates are used to prove simple geometric theorems algebraically. Volume formulas are explored and explained. Two-dimensional and three-dimensional visualizations are explored. All geometric concepts are used to model situations and real-life events.

### Overview of Units:

1. Congruence and Constructions
2. Congruence, Similarity & Proof
3. Trigonometric Ratios & Geometric Equations
4. Spatial Reasoning: Polygons, Solids, Area and Volume

BOE APPROVAL: August 2018

## Unit 2

**Unit Name:** Congruence, Similarity & Proof**Primary Resource:** Big Ideas Math Geometry by Ron Larson, 2015**Duration:** Approximately 11 weeks**WEEK 12****Essential Question:** How can you translate a figure in a coordinate plane?

4.1

NJSLS Standards	Concepts <i>What student will know.</i>	Skills <i>What students will be able to do.</i>	Activities	Assessments and Checks for Understanding
<b>HSG-CO.A.2.</b> Represent transformations in the plane using, e.g., transparencies and geometry software; describe transformations as functions that take points in the plane as inputs and give other points as outputs. Compare transformations that preserve distance and angle to those that do not (e.g., translation versus horizontal stretch). <b>HSG-CO.A.4.</b> Develop definitions of rotations, reflections, and translations in terms of angles, circles,	<b>Lesson Vocabulary:</b> vector, initial point, terminal point, horizontal component, vertical component, component form, transformation, image, preimage, translation, rigid motion, composition of transformations  <b>Learning Goals:</b> The student will use translations to move	<ul style="list-style-type: none"><li>• Perform translations</li><li>• Perform compositions</li><li>• Solve real-life problems involving compositions</li></ul>	<ul style="list-style-type: none"><li>• Mathematical practices p. 172</li><li>• Explorations: 1, 2, 3 p. 173, Translations</li><li>• Discuss vocabulary</li><li>• Core Concept p. 174</li><li>• Translation Postulate &amp; Composition Theorem, p.176</li><li>• Use modeling with math word problems to illustrate real life examples of translations.</li><li>• Use GeoGebra to demonstrate translations.</li></ul>	<b>Formative:</b>  Analyzing students' work and explorations in Dynamic Geometry Software, pg. 172 Analyzing Student classwork Strategic Questioning Thumbs up Think-Pair-Share Monitoring Progress questions 1-4 p. 175 Exit Slips Do Nows Leveled Homework p. 178 Mini assessments p. 180 TE Quizzes  <b>Summative:</b>

BOE APPROVAL: August 2018

**NJSLS-ELA**

**RST.11-12.3** Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.

**RST.11-12.4** Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11-12 texts and topics.

**RST.11-12.9** Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

**RST.11-12.10** By the end of grade 12, read and comprehend science/technical texts in the grades 11-CCR text complexity band independently and proficiently.

**W.11-12.1** Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

**W.11-12.2.D** Use precise language, domain-specific vocabulary, and techniques such as metaphor, simile, and analogy to manage the complexity of the topic.

**NJSLS-S: Physics**

**HS-PS3-2** Energy Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects)

**HS-PS3-5.5** Develop and use a model of two objects interacting through electric or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction

**HS-PS2-4** : Forces and Motions Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects

**NGSS Practices:**

*Analyzing and Interpreting Data:* Analyze data using tools, technologies, and/or models (e.g., computational, mathematical) in order to make valid and reliable scientific claims or determine an optimal design solution.

*Developing and Using Models:* Develop or use a model based on evidence to illustrate the relationships between systems or between components of a system.

*Engaging in Argument from Evidence:* Make and defend a claim based on evidence about the natural world that reflects scientific knowledge, and student-generated evidence.

**NJSLS- Biology**

**HS-LS3 Heredity: Inheritance and Variation of Traits**

**HS-LS3-2.** Make and defend a claim based on evidence that inheritable genetic variations may result from (1) new genetic

BOE APPROVAL: August 2018

combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors.

**NJSLS-Technology:**

Students will use Desmos, GeoGebra or the TI-84 calculator to assist in graphing and analyzing these equations. They will discuss their findings with the instructor and their classmates. Students will participate in activities on Google Classroom and other online resources, Desmos, GeoGebra, IXL

**8.1.12.A.3** Collaborate in online courses, learning communities, social networks or virtual worlds to discuss a resolution to a problem or issue.

**8.1.12.A.4** Construct a spreadsheet workbook with multiple worksheets, rename tabs to reflect the data on the worksheet, and use mathematical or logical functions, charts and data from all the worksheets to convey the results.

**Career Ready Practices:**

**CRP2.** Apply appropriate academic and technical skills.

**CRP4.** Communicate clearly and effectively and with reason

**CRP8.** Utilize critical thinking to make sense of problems and persevere in solving them.

**CRP11.** Use technology to enhance productivity

**21st Century Life and Career:**

**9.1.12.B.6** Design and utilize a simulated budget to monitor progress of financial needs.

**9.1.12.C.2** Compare and compute interest and compound interest and develop an amortization table using business tools.

**9.1.12.C.3** Compute and assess the accumulating effect of interest paid over time when using a variety of sources of credit.

BOE APPROVAL: August 2018

Integrated Differentiation/Accommodations/Modifications for <b>Geometry Unit 2</b> <i>(Alternate Modes of Instruction and Support)</i>		
Modifications to Support Gifted and Talented Students	Modifications to Support English Language Learners	Modifications to Support Our Learners (Students with IEPs/504s and At-Risk Learners)
<p>See specific modifications in each lesson.</p> <p>Integrate Higher Order Thinking Skills (HOTS) through questioning and extension projects specific to linear equations, inequalities and functions</p> <p>Provide menu of challenge activities for when the child finishes the lesson early (integrate technology when possible).</p> <p>College/Career Readiness skill enhancement - G &amp; T students can research professions related to the Algebra.</p> <p>Have the student teach the lesson - peer tutoring (research-based strategy)</p> <p>Accelerate pace for students who are advanced in concepts.</p> <p>Use inquiry-based, discovery learning approaches that emphasize open-ended problems with multiple solutions or multiple paths to solutions.</p> <p>Allow students to design their own ways to find the answers to complex questions.</p> <p>Prove Ceva's theorem, p. 452</p>	<p>See specific modifications in each lesson.</p> <p><b>Concept/Idea Map</b> - teacher models note-taking on transformations, reflections rotations, dilations, similarity Theorems, and constructions.</p> <p><b>Contextualize language</b> See each lesson for specific vocabulary</p> <p><b>Visuals and illustrations</b> to be used for transformations, reflections rotations, dilations, similarity Theorems, and constructions and other concrete terms.</p> <p><b>Word/picture bank</b> available for students' reference in classroom, online and in their textbooks.</p> <p><b>Wait Time Two</b> - extend basic "Wait Time" - after the 1st student responds to a question, the teacher waits an additional 5 - 7 seconds before calling on another student to ask a question about this unit.</p> <p><b>Native Language Supports</b> (peer, online assistive technology, translation device, bilingual dictionary)</p> <p>Teach the text backward - <b>frontload</b> the concepts and vocabulary needed for learning the material and activating prior</p>	<p>See specific modifications in each lesson.</p> <p>Review student individual educational plan and/or 504 plan for instructional, assessment, and environmental supports.</p> <p>Allow student to use calculator to solve numerical problems.</p> <p>Teach students how to check the accuracy of the solution that was derived from use of the graphing calculator.</p> <p>Utilize manipulatives and/or visuals within instructional presentation of transformations, reflections rotations, dilations, similarity Theorems, and constructions.</p> <p>Teach students how to check the accuracy of the solution that was derived from use of the calculator or other method.</p> <p>Utilize graphic organizer or partially completed template for students to solve word problems and other complex problems in the unit.</p> <p>Provide study guides that are partially completed by teacher, allowing the student to fill in missing information during instruction in order to aid in obtaining information pertaining to modeling figures as they are transformed, reflected, rotated, dilated. Provide assistance when using similarity Theorems and doing constructions.</p>

BOE APPROVAL: August 2018

	<p>knowledge vocabulary, see specific lesson for vocabulary list.</p> <p>Use a <b>word square</b> to teach target academic vocabulary for this unit.</p>	<p>Utilize visual aids such as charts or graphs connected to geometric terms and procedures to provide explicit instruction in how to analyze or use the data or information.</p> <p>By utilizing individual student assessment results, the teacher will provide small group or remedial instruction to review essential questions/big ideas, key concepts and provide additional explanations, more examples, and to model procedures in finding the solutions to particular problems.</p> <p>Provide wait time to allow students to process orally presented information and questions relating to the unit.</p> <p>Access to word/picture banks to develop an understanding and use content-specific vocabulary.</p> <p>Allow for Student Choice: Students should be permitted to demonstrate understanding of content through illustrations, computer projects, oral response, creative presentations or demonstration, etc.</p> <p>Support comprehension of unknown vocabulary, by providing examples of Note-taking, highlighting, underlining, etc.</p> <p>Students should be allowed given copies of grade level material or text so they can highlight or underline pertinent information.</p> <p>Text to speech/Oral reading if necessary</p> <p>Provide students with flexible seating options while working independently, depending on need or preference.</p> <p>Math-specific vocabulary and literary terms should be pre-taught before teaching relevant concepts.</p> <p>Allow extra time to complete in class written assignments.</p>
